I am a young motivated student with a good professional experience in Web development. As I'm studying IT three days a week, I'm looking for a part time job which could allow me to work for an exciting project as part of a team. I'm also looking for a full time job for the next summer (2009).

Technical skills:

Web development: **PHP, Javascript (AJAX, Scriptaculous and JQuery library), (X)HTML, CSS, XML**
I am aware of various W3C standards, and compatibility between different browsers

Software development : **C#, C/C++, Java** and scripting languages.
Design : Photoshop, FlashSlider, Expression Blend(WPF).
Databases : **MySQL**, SQL Server, Oracle.
IDE/Editors : **Visual Studio, Scite**, Eclipse.

Education:

2007 – 2009 : Master of Computer Science, in progress - SUPINFO
London (England).

2005 – 2007 : Two years university degree in IT - SUPINFO.
Macon (France).

2004 – 2005 : Baccalauréat Science with honours (A- level) - Lycée Boisjoly Potier
Le Tampon (Reunion island, French DOM)

Professional experience:

Apr 08 – Jun 08 : **Web Developer**
Bloogistics Full time / 3 month
London (Eng) *I created a web application in Ajax with the JQuery library, that was a search engine for travelling everywhere in Europe. That job taught me a lot of new technologies and how it's work in very little company (startup). The principal constraint was to make the application working perfectly on all the version of the different web browser. I also learn how to work in a small team for programming an entire project.*
Skills applied : Ajax(Javascript), PHP, (X)HTML, CSS, MySQL

Jul 08 – Nov 08 : **Web Administrator (Working from home)**
Umih Bourgogne
Dijon (FR)
Part time(2 day a week) / 2 month
I managed the regional website that I created in my previous placement and modified the entire design (CSS, Photoshop, Flashslider). I worked with other people who are not IT specialist but we could share idea and trying to make the website better for everybody. I also created micro web site included in the principal one for each part of it using PHP, MySQL. In this work I learned a lot of technical things, the basis of design and to mixed everyone ideas for find the best way to reach a target.
Skills applied : (X)HTML, CSS, PHP, MySQL, Javascript

Jul 07 – Oct 07 : **Website developer**
Umih Bourgogne
Dijon (FR)
Full time / 3 month
I worked for a French association of restaurant and hotel located in Burgundy. This time I worked freelance so I learn to take decision by myself and being responsible. I created for this association a entire website (client side and back office) using PHP / MySQL for their easy utilisation and strong open source community. This 3 month learned me how to build a complete project, from the beginning to the end. I had to take many decisions and I'm now more comfortable on how resolve a problem.
Skills applied : (X)HTML, CSS, PHP, MySQL, Javascript

Jul 06 – Oct 06 : **Intranet website developer**
Alliade SI
Lyon (FR)
Full time / 3 month
I worked for a French company named Alliade (<http://www.alliade.com/>), this position was in Lyon. I took part of a big project of intranet website for all the other company who are client of Alliade. My principal mission in this team was to replace a couple of modules in Java by the same thing in Javascript. Most of them were using Xml document so I learned to use Jdom library. After this work the old intranet web site was replace by the new one more easy to use and to administrate.
This first real work experience taught me technical thing for sure but mostly how to work in a big company, with other persons.
Skills applied : (X)HTML, CSS, Javascript, Xml

School projects :

- 2007 – 2008 : **Sip project**
I worked on a team of four people, developed a SIP client using C#.
My principal mission was to create function for export the database in different format (Csv,Xml,Xls,Json). We used WPF for the design of this project so it was an opportunity to see the new tools expression blend from Microsoft. I learned on this project to work with sharing code tools like SVN.
Skills applied : C#, MySQL, WPF
- 2006 – 2007 : **Monitoring project with web interface**
We were a team of five student developed a web interface witch monitored a few server, I was a developer in this team . We used PHP and Javascript for the web interface but also Perl for the scripting on all the Unix server. In this project I learned a lot of technical thing in this different language.
Skills applied : Perl, PHP, Javascript
